

Kopfrechnen • Addition und Subtraktion von Brüchen Übung

$$\frac{1}{5} + \frac{3}{5} =$$

$$\frac{2}{11} + \frac{9}{11} =$$

$$\frac{5}{6} - \frac{4}{6} =$$

$$\frac{1}{2} + \frac{1}{3} =$$

$$\frac{4}{5} - \frac{1}{4} =$$

$$\frac{11}{9} - \frac{9}{11} =$$

$$\frac{10}{7} - 1 =$$

$$\frac{5}{8} + \frac{5}{12} =$$

$$\frac{5}{24} - \frac{4}{27} =$$

$$\frac{5}{12} - \frac{7}{18} =$$

Kopfrechnen • Addition und Subtraktion von Brüchen

Lösung

$$\frac{1}{5} + \frac{3}{5} = \frac{4}{5}$$

$$\frac{2}{11} + \frac{9}{11} = 1$$

$$\frac{5}{6} - \frac{4}{6} = \frac{1}{6}$$

$$\frac{1}{2} + \frac{1}{3} = \frac{5}{6}$$

$$\frac{4}{5} - \frac{1}{4} = \frac{11}{20}$$

$$\frac{11}{9} - \frac{9}{11} = \frac{40}{99}$$

$$\frac{10}{7} - 1 = \frac{3}{7}$$

$$\frac{5}{8} + \frac{5}{12} = \frac{25}{24}$$

$$\frac{5}{24} - \frac{4}{27} = \frac{13}{216}$$

$$\frac{5}{12} - \frac{7}{18} = \frac{1}{36}$$
